

WE'RE ON A JOURNEY ENERGY POLICY

GEFRIERTROCKNUNG GREVEN

EVER GREATER ENERGY EFFICIENCY – A CHOICE AND A DUTY

Using energy sensibly and sustainably is something on which we've always placed a strong emphasis – and which is becoming ever more important. At Gefriertrocknung Greven, the importance of energy efficiency – and how we aim to realise it – is shown by our energy policy.

This is rooted in our corporate principles and has been put together by the management team. Our objective is to continuously improve our energy performance.

ENVIRONMENTAL AND ECONOMIC

Using our freeze-drying technology, we boost the value of food. These processes are energy-intensive and we are always striving to optimise them further.

Our motivation is both environmental and economic. And it goes without saying that we make available adequate quantities of the necessary resources for this purpose.

THE FOUNDATIONS OF OUR ENERGY POLICY

The foundation for complying with energy-related legal requirements is the environmental guidelines of our sister company Freeze-Dry Foods.

We also take into account a range of ethical factors across all areas of the business. These are formulated in the Freeze-Dry Foods sustainability policy and elsewhere.

Our energy policy is recognised and established throughout the company. We regularly verify that it remains fit for purpose. We take adequate measures to ensure that it is communicated to our employees. Developing and implementing our management system is a duty of which we are highly conscious. To verify the efficacy of the system, we carry out a management review once every year. We also define measurable energy targets that increase our energy efficiency.

ENERGY POLICY. **OUR TARGETS, OUR PATHWAY:**

- Think about energy efficiency at the earliest possible stage. That means already during planning and procurement.
- Determine or provide all necessary information and data.
- Constantly promote conscious, economical, efficient energy use at all levels.
- Continuously improve our energy management.

The company views our energy policy as both a duty and a declaration of intent – by both the management team and every single employee.

Approved by the management team on August 12, 2024

Markus Weddeling
Managing Director
